

MML forms strategic partnership in South America

December 08

Micro Materials Ltd (Wrexham UK) are pleased to announce the extension of their global distribution network to South America. MML have formed a partnership with Valley Research (Houston, US), a scientific distribution company who have been established in the South American market since 1991.

Valley Research have regional offices in Brazil, Mexico and Argentina, ensuring excellent sales and service support to key south American markets. They offer a full range of scientific equipment, and enjoy an excellent relationship with their customers.

Commenting on this partnership, Paul Grasske, Managing Director of MML said 'The timing of this partnership agreement is excellent, as we are seeing a surge in interest in our unique NanoTest system across south America. Valley have an excellent track record and we are confident they will provide excellent service to our customers in the region.'

MML are manufacturers of the highly accurate, precise and flexible NanoTest nano-indentation system. The NanoTest is in use throughout the world in high profile institutions such as MIT, Cambridge University, KAIST, Kodak, Siemens and General Motors.
